EDUCATION

Bachelors in Computer Science and Information Technology

NED University of Engineering and Technology

In progress

TECHNICAL SKILLS

Html/CSS

Bootstrap

Web Development

Data Structures

Object Oriented Programming

Problem Solving

Machine learning

Artificial Intelligence

Technical Content Writing

PROGRAMMING LANGUAGES

C++

Python

JavaScript

STRENGTHS

Punctuality   Team player

Collaboration   Eye for detail

Prompt engineering skill

ABOUT ME:

Goal-driven 8th-semester Computer Science student at NED University, Karachi, with a specialization in web development. Successfully completed an internship at Sayabi Devs, Codesoft and KDA (IT department) and PIA(React native developer), gaining valuable hands-on experience in web application development. Passion for exploring cybersecurity and Cloud Computing. Played an active role in assisting with the implementation of test-driven development practices during my internship and engaged in manual and automated testing of web applications during my internship and supported the integration of AI and ML technologies.

WORK EXPERIENCE

Web Developer (Intern)

SAYABI DEV

- Acquired practical knowledge in web development methodologies, technologies, and best practices.
- Developed responsive and user-friendly websites using HTML, CSS, and JavaScript.
- Implemented and maintained efficient database systems for data storage and retrieval.

CODESOFT

- Focused on code reusability
- Used traditional script tags in HTML for including JavaScript files in web pages.
- Organized code without separating it into modular components.

KDA IT DEPARTMENT

- Participated in the development of IT functions such as software development.
- Contributed in centralized data bank and data warehouse for managing city's progress and development infrastructure data.
- Collaborated with team members to identify and address IT needs across various city's departments.

PAKISTAN INTERNATIONAL AIRLINE

- React Native: Build native mobile apps with JavaScript.
- Firebase: Comprehensive platform for building and scaling apps.
- Real-time Database: Sync data across all connected clients.
- Cloud Firestore: Flexible, scalable NoSQL database.

PROJECTS

- Dictionary using python and json (Programming Fundamentals).
- Donation Drive Using C++. (Object Oriented Programming).
- Stock Exchange System Using Recursion,Tree,Linked list. (Data Structures and Algorithms).
- Pharmacy Management System (Database Management System).
- Operating System 32 bits (Operating System).
- Ai Surveillance Camera image reconstruction .
- Airplane cannibalization using react native and firebase.

CERTIFICATES

- Problem Solving (Basics): hackerrank
- Python (Basic): hackerrank
- Digital marketing:Google
- Advance data analysis:Google
